

Latex & Cloudbuster™ Balloon Helium Chart

All 11" Pearl and Metallic balloons are produced on super-sized forms; while the uninflated balloons look larger than other balloons of the same size, they are designed to inflate to the same size as Standard, Jewel, and Fashion Colours.

NOTE: The listed average inflation sizes, flying times, and numbers of balloons per helium tank are conservative averages.

Actual flying times vary depending on temperature and atmospheric conditions.

All Qualatex® latex balloons are helium-weight quality and are manufactured in the USA or Canada from biodegradable, pure, natural latex.

* **The use of ULTRA HI-FLOAT® balloon flight extender is recommended for all helium-filled latex balloons. ULTRA HI-FLOAT can increase the flying times of latex balloons up to 25 times longer than untreated balloons. For more information about ULTRA HI-FLOAT, visit www.hi-float.com.**

** Because the filling and usage of display balloons is beyond our control, no performance or longevity guarantee can be made.

Inflating Cloudbusters with 60/40 helium and air will reduce the amount of helium needed. See page 213 for Conwin 60/40 regulator.

ULTRA HI-FLOAT is a trademark of the HI-FLOAT Co., in Louisville, KY, USA. *Estimates for typical indoor conditions. Flying time will be less outdoors and varies greatly depending on humidity, temperature, altitude, etc. Balloons typically float half as long in summer as in winter.

ULTRA HI-FLOAT is an aqueous solution containing a special water-soluble plastic. It dries inside the latex balloon to form a barrier coating that helps hold in helium.

Microfoil Balloon Helium Chart

NOTE: The listed average inflation sizes and numbers of balloons per helium tank are conservative averages.

A properly inflated, helium-filled Microfoil balloon will float for at least 3-5 days and can be easily refreshed.

Actual flying times vary depending on temperature and atmospheric conditions.
